# INSTRUCTIONS

**GENERAL:** To be effectively filed with the Plant Variety Protection Office (PVPO). ALL of the following items must be received in the PVPO: (1) Completed application form signed by the owner; (2) completed exhibits A, B, C, E; (3) for a seed reproduced variety at least 2,500 viable untreated seeds, for a hybrid variety at least 2,500 untreated seeds of each line necessary to reproduce the variety, or for tuber reproduced varieties verification that a viable (in the sense that it will reproduce an entire plant) tissue culture will be deposited and maintained in an approved public repository; (4) check drawn on a U.S. bank for \$2,705 (\$320 filing fee and \$2,385 examination fee), payable to "Treasurer of the United States" (See Section 97.6 of the Regulations and Rules of Practice.) Partial applications will be held in the PVPO for not more than 90 days, then returned to the applicant as unfilled. Mail application and other requirements to Plant Variety Protection Office, AMS, USDA, Room 500, NAL Building, 10301 Baltimore Avenue, Beltsville, MD 20705-2351. Retain one copy for your files. All items on the face of the application are self explanatory unless noted below. Corrections on the application form and exhibits must be initialed and dated. **DO NOT** use masking materials to make corrections. If a certificate is allowed, you will be requested to send a check payable to "Treasurer of the United States" in the amount of \$320 for issuance of the certificate. Certificates will be issued to owner, not licensee or agent.

## ITEM

- 18a. Give: (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method;  
(2) the details of subsequent stages of selection and multiplication;  
(3) evidence of uniformity and stability; and  
(4) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified
- 18b. Give a summary of the variety's distinctness. Clearly state how this application variety may be distinguished from all other varieties in the same crop. If the new variety is most similar to one variety or a group of related varieties:  
(1) identify these varieties and state all differences objectively;  
(2) attach statistical data for characters expressed numerically and demonstrate that these are clear differences; and  
(3) submit, if helpful, seed and plant specimens or photographs (prints) of seed and plant comparisons which clearly indicate distinctness.
- 18c. Exhibit C forms are available from the PVPO Office for most crops; specify crop kind. Fill in Exhibit C (Objective Description of Variety) form as completely as possible to describe your variety.
- 18d. Optional additional characteristics and/or photographs. Describe any additional characteristics that cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the characteristics that are difficult to describe, such as plant habit, plant color, disease resistance, etc.
- 18e. Section 52(5) of the Act requires applicants to furnish a statement of the basis of the applicant's ownership. An Exhibit E form is available from the PVPO.
19. If "Yes" is specified (*seed of this variety be sold by variety name only, as a class of certified seed*), the applicant MAY NOT reverse this affirmative decision after the variety has been sold and so labeled, the decision published, or the certificate issued. However, if "No" has been specified, the applicant may change the choice. (See Regulations and Rules of Practice, Section 97.103).
21. See Section 83 of the Act for the Contents and Term of Plant Variety Protection.
22. See Sections 41, 42, and 43 of the Act and Section 97.5 of the regulations for eligibility requirements.
23. See Section 5.5 of the Act for Instructions on claiming the benefit of an earlier filing date.

21. CONTINUED FROM FRONT (Please provide a statement as to the limitation and sequence of generations that may be certified.)

22. CONTINUED FROM FRONT (Please provide the date of first sale, disposition, transfer, or use for each country and the circumstances, if the variety (including any harvested material) or a hybrid produced from this variety has been sold, disposed of, transferred, or used in the U.S. or other countries.)

23. CONTINUED FROM FRONT (Please give the country, date of filing or issuance, and assigned reference number, if the variety or any component of the variety is protected by intellectual property right (Plant Breeder's Right or Patent).)

U.S. Patent 4,940,835 issued to Shah et al. as per the Roundup Ready Gene in this variety

**NOTES:** It is the responsibility of the applicant/owner to keep the PVPO informed of any changes of address or change of ownership or assignment or owner's representative during the life of the application/certificate. There is no charge for filing a change of address. The fee for filing a change of ownership or assignment or any modification of owner's name is specified in Section 97.175 of the regulations. (See Section 101 of the Act, and Sections 97.130, 97.131, 97.175(h) of the Regulations and Rules of Practice.)

To avoid conflict with other variety names in use, the applicant must check the variety names proposed by contacting: Seed Branch, AMS, USDA, Room 213, Building 306, Beltsville Agricultural Research Center—East, Beltsville, MD 20705. Telephone: (301) 504-8089.

## Soybean Variety 90B74

Variety 90B74 evolved from a cross made in the winter 1994/95 crossing block in Chile with the following parentage:

Parentage: 90B43/12465

12465 = 9132/90733

90733 = 9172/90676

90676 = ST2250/G40-3P9392\*

\*G40-3P9392 is an experimental line with the Roundup Ready (40-3-2) gene.

Variety 90B74 is an F4-derived line which was advanced to the F4 generation by modified single-seed descent. The F5 progeny row of 90B74 was grown in a plant row yield trial in the summer of 1998. Subsequently, 90B74 has undergone three years of extensive testing and purification and has been observed by the breeder to be uniform and stable for all plant traits from generation to generation, with no evidence of variants. On the basis of yield and resistance to Roundup labeled herbicides, variety 90B74 was assigned a commercial number.

The purification block was grown during winter of 1999/2000 in Chile and 40 sublines were harvested. Forty (40) subline families of 90B74 were grown in the summer of 2000. Thirty three (33) sublines families were harvested and bulked. A 50 acre increase (breeders seed) was grown in Chile during the winter of 2000/2001. One thousand two hundred thirty three (1233) acres of parent seedstock (foundation seed equivalent) were grown in the summer of 2001.

200200088

Exhibit B. Statement of Distinctness

Soybean Variety 90B74

Variety 90B74 is most similar to variety 90B72. Both varieties have purple flowers, gray pubescence, similar relative maturity, and resistance to Roundup branded herbicides. However, 90B74 has yellow seeds with buff hila and resistance to *Phytophthora megasperma* as governed by the Rps1c gene whereas 90B72 has yellow seeds with gray hila, and is susceptible to *Phytophthora megasperma*, as it does not carry a Rps1 resistance allele.

Variety 90B74 is also similar to variety 90B73. Both varieties have purple flowers, and resistance to Roundup branded herbicides. However, 90B74 has gray pubescence, yellow seeds with buff hila and resistance to *Phytophthora megasperma* as governed by the Rps1c gene whereas 90B73 has tawny pubescence, yellow seeds with brown hila, and is susceptible to *Phytophthora megasperma*, as it does not carry a Rps1 resistance allele

Variety 90B74 is also similar to CX075 from DeKalb (Monsanto). Both varieties have purple flowers, gray pubescence and resistance to *Phytophthora megasperma* as governed by the Rps1c gene. However, 90B74 has yellow seed with buff hila and resistance to Roundup branded herbicides whereas CX075 has yellow seed with gray hila and is susceptible to Roundup branded herbicides.

F. TRANSGENIC COMPOSITION

Has the development of the subject variety included the insertion of genetic material from an organism other than a soybean, or, the removal of genetic material from the application variety?

If yes, please complete the following information requests\*. Use additional pages if necessary.

☒ X

YES

☐

NO

1. Please state the vector's name:

2. Please state the vector components:

3. Please describe the genetic material successfully transferred into the subject variety:

4. Please describe the insertion protocol:

\* A literature citation(s) explaining the four information requests above may be an acceptable alternative to completion of the "Transgenic Composition" portion of this form. This section is fully address in the following publication. Specific details of the vector components and insert elements are summarized in Figure 1 and Table 1 on page 1453. Padgett, S.R. et al. Development, Identification, and Characterization of a Glyphosate-Tolerant Soybean Line. 1995. Crop Science. 35:1451-1461

G. BIOCHEMICAL MARKERS

Please describe any biochemical information here, which you believe will be helpful in further describing the subject variety (e.g. Simple Sequence Repeats, Restriction Fragment Length Polymorphisms, Isozymic Characterization). Use additional pages if necessary.

Exhibit D. Additional Description of the Variety

Soybean Variety 90B74

In Exhibit C we have identified variety 90B74 as susceptible to bacterial blight, brown spot, pod and stem blight, rhizoctonia root rot, bud blight, yellow mosaic, cowpea mosaic, pod mottle and seed mottle.

This does not mean that variety 90B74 is any worse for these problems than other varieties of similar maturity. Rather, we do not consider 90B74 to be immune to these problems. Therefore, we have chosen to be conservative and have identified the line as "susceptible".

Variety 90B74 is a mid Group 0 variety. If Group 0 varieties are divided into tenths, the relative maturity of 90B74 is 0.7.

FORM APPROVED - OMB No. 0581-0055

U.S. DEPARTMENT OF AGRICULTURE  
AGRICULTURAL MARKETING SERVICE

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552a) and the Paper Reduction Act (PRA) of 1995.

**EXHIBIT E  
STATEMENT OF THE BASIS OF OWNERSHIP**

Application is required in order to determine if a plant variety protection certificate is to be issued (7 U.S.C. 2421). The information is held confidential until the certificate is issued (7 U.S.C. 2426).

1. NAME OF APPLICANT(S) Pioneer Hi-Bred International, Inc	2. TEMPORARY DESIGNATION OR EXPERIMENTAL NUMBER	3. VARIETY NAME 90874
4. ADDRESS (Street and No., or R.F.D. No., City, State, and ZIP, and Country) 7300 N.W. 62 <sup>nd</sup> Avenue P.O. Box 1004 Johnston, IA 50131-1004	5. TELEPHONE (Include area code) 515-254-2638	6. FAX (Include area code) 515-253-2478
7. PVPO NUMBER		2002000999

8. Does the applicant own all rights to the variety? Mark an "X" in the appropriate block.  
If no, please explain.

☒ X YES ☐ NO

9. Is the applicant (individual or company) a U.S. National or a U.S. based company?  
If no, give name of country

☒ X YES ☐ NO

10. Is the applicant the original owner?

☒ X YES ☐ NO

If no, please answer one of the following:

a. If the original rights to variety were owned by individual(s), is (are) the original owner(s) a U.S. National(s)?

☐ YES ☐ NO

If no, give name of country

b. If the original rights to variety were owned by a company(ies), is (are) the original owner(s) a U.S. based company?

☐ YES ☐ NO

If no, give name of country

11. Additional explanation on ownership (if needed, use the reverse for extra space):

**Please Note:**

Plant variety protection can only be afforded to the owners (not licensees) who meet the following criteria:

1. If the rights to the variety are owned by the original breeder, that person must be a U.S. national, national of a UPOV member country, or national of a country which affords similar protection to nationals of the U.S. for the same genus and species.
2. If the rights to the variety are owned by the company which employed the original breeder(s), the company must be U.S. based, owned by nationals of a UPOV member country, or owned by nationals of a country which affords similar protection to nationals of the U.S. for the same genus and species.
3. If the applicant is an owner who is not the original owner, both the original owner and the applicant must meet one of the above criteria.

The original breeder/owner may be the individual or company who directed the final breeding. See Section 41(a)(2) of the Plant Variety Protection Act for definitions.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0581-0055. The time required to complete this information collection is estimated to average 6 minutes per response, including the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
